

Learning Goal: I can solve word problems involving capacity, and justify my answer.

1. If Michelle drinks 2 L of water a day, how much will she drink in a week? In a month?

2.) Jenny needs to take 5 mL of medicine, one time a day. How much will she take in one week?

3.) If one bucket holds 2 L of water, how many would 9 buckets hold?

4.) At a party, Hamshika drank 42 mL of lemonade, and 28 mL of orange juice. How much did Hamshika drink altogether?

5.) Varundeeep started with 56 mL of orange juice and Kaden drank 24 mL of it. How much did Varundeeep have left?
